

Key Steps for Testing a Bot and Pushing it to Production

1 On the IQ Bot Portal:

Go to the **Learning Instances** page >
Click Instance name.
On the View details page, click Edit Bot.

2 On the IQ Designer Page, go to IQ Test.

- Add test documents.
- Run the test.
- Validate the test result.
- Retrain Bot, if required.
- On successful document identification:
 - Push the individual Bots to Production, or
 - Push the entire Learning Instance to Production.

3 To test Bots anytime:
On the IQ Bot Portal >
Bots Page>
Click the play button
for a Bot
